Management Discussion and Analysis

BUSINESS REVIEW AND OUTLOOK

In the first half of 2019, the National Healthcare Security Administration (the “NHSA”) has implemented a series of reform measures to control medical insurance expenditure, such as procurement with volume in 4+7 pilot cities and the reform of medical insurance payment methods. The Group actively adjusted its strategy to adapt to medical insurance expenditure containment and supervision. While ensuring the quality of healthcare services, the Group improved and adjusted the charging structure to control medical expenses. The following progress has been made:

In the first half of 2019, the Group’s owned hospital business developed steadily. Hangzhou Yining Hospital, Taizhou Kangning Hospital and Luqiao Cining Hospital, which were opened in 2018 as well as Wenling Nanfang Hospital, Nanjing Yining Hospital, Guanxian Yining Hospital and Heze Yining Hospital, which were consolidated by mergers and acquisitions, all have been on the right track in their business development. The businesses of the Group’s mature hospitals have developed stably, the service volume of Pingyang Kangning Hospital and Geriatric Hospital has increased fast as compared with that of the same period of last year. The business of Qingtian Kangning Hospital, Yongjia Kangning Hospital and Cangnan Kangning Hospital has been constrained by space concerns, however, these three hospitals have sought new sites to implement relocation projects and are expected to add 800 beds. With the increasing demand for high-end psychological services and growing influence of the Group’s brand, the number of outpatients and inpatients in Beijing Yining Hospital has increased significantly. As of June 30, 2019, the number of the Group’s owned hospitals increased to 20 (December 31, 2018: 18) and the number of beds under operation increased to 5,593 (December 31, 2018: 5,140).

In the first half of 2019, in order to concentrate strength and energy on the development of owned hospitals, the Group slightly reduced business of healthcare facilities management. During the Reporting Period, Wenzhou Cining Hospital, Yiwu Psychiatric Health Center, Pingyang Changgeng Ward, Pujiang Hospital and Chun’an Hospital had stable business, while the management service of Yanjiao Furen Hospital was substantively suspended due to agreement dispute (for details, please refer to the announcement of the Company dated June 25, 2019). As of June 30, 2019, the number of healthcare facilities under management by the Group decreased to 5 (December 31, 2018: 6) and the number of beds under management decreased to 990 (December 31, 2018: 1,160).

In the first half of 2019, while steadily developing our existing hospitals, the Group continued to develop the healthcare facilities network through mergers and acquisitions. We collectively held 51% equity interest in Beijing Yining Hospital through capital increase and collectively held 65% equity interest in Huainan Kangning Hospital through acquiring equity interest (for details, please refer to the announcement of the Company dated May 14, 2019).

Looking into the future, with the further development of building a healthy China and the strong demand for healthcare service, the medical insurance payment methods will be more scientific and reasonable. While expanding the healthcare service network, the Group will further optimize the service positioning, actively dock with commercial insurance, vigorously expand non-medical insurance business, and strive to achieve stable and sustainable development of healthcare business.

Management Discussion and Analysis

Income Tax Expense

During the Reporting Period, income tax expense decreased to RMB7.1 million (for the six months ended June 30, 2018: RMB18.3 million), representing a decrease of 61.0% as compared with that of the same period of 2018, mainly due to the decrease of 10.9% of the Group's profits before income tax during the Reporting Period as compared with that of the same period of 2018. For the Reporting Period and the six months ended June 30, 2018, our actual tax rates were 13.5% and 30.9%, respectively. The decrease in actual tax rates during the Reporting Period was mainly due to the unrecognized deferred income tax liability, as the investment income generated from the investment of Beijing Yining Hospital and Huainan Kangning Hospital was a taxable temporary difference related to the investment of the subsidiaries and most likely cannot be taxed.

(All amounts in RMB Yuan unless otherwise stated)

2. Summary of significant accounting policies and accounting estimates (*continued*)

(2) Statement of compliance with the Accounting Standards for Business Enterprises

The financial statements of the Company for the six months ended 30 June 2019 are in compliance with the Accounting Standards for Business Enterprises, and truly and completely present the consolidated and the Company's financial position of the Company as at 30 June 2019 and their financial performance, cash flows and other information for the period then ended.

(3) Leases

A lease refers to the contract in which the lessor transfers the right-of-use of the assets to the lessee for a certain period of time to obtain the consideration.

The Group as the Lessee

The Group recognises the right-of-use assets on the commencement date of the lease period and recognises the lease liabilities at the present value of the lease payments that have not been paid. The lease payments comprise fixed payments and payments to be made in the event that it is reasonably determined to exercise the purchase option or terminate the lease option. The variable rentals determined at a certain percentage of sales are not included in the lease payments and are recognised in profit or loss when incurred. Lease liabilities that are paid within one year (inclusive) as from the balance sheet date are included in the current portion of non-current liabilities.

The Group's right-of-use assets mainly comprise the leased buildings. Right-of-use assets are initially measured at cost, which includes the initial measurement amount of the lease liabilities, the lease payments paid on or before the commencement date of the lease period and the initial direct costs, less the lease incentives received. When it can be reasonably determined that the ownership of the leased asset will be obtained by the Group at the end of the lease term, the leased asset is depreciated over its remaining useful life; otherwise, the leased asset is depreciated over the shorter of the lease term and its remaining useful life. The carrying amount of the right-of-use assets is reduced to the recoverable amount when the recoverable amount is below the carrying amount.

For short-term leases with the lease term of no more than 12 months and low-value asset leases of a brand new individual asset with a low value, the Group chooses not to recognise the right-of-use assets and lease liabilities, and the relevant lease payments are recognised on a straight-line basis over the period of the lease, and are either capitalised as part of the cost of related assets, or charged as an expense for the current period.

Notes to the Financial Statements

For the six months ended 30 June 2019

(All amounts in RMB Yuan unless otherwise stated)

2. Summary of significant accounting policies and accounting estimates (*continued*)

(3) Leases (*continued*)

The Group as the lessor

A lease that transfers substantially almost all the risks and rewards incidental to ownership of a lease asset is a finance lease. An operating lease is a lease other than a finance lease.

(a) Operating leases

For the self-owned buildings, machinery and equipment and motor vehicles leased out under operating lease, the rental income from operating lease is recognised on the straight-line basis over the lease terms. The variable rentals determined at a certain percentage of sales are recognised in rental income when incurred.

(b) Impairment

Right-of-use assets are tested for impairment if there is any indication that the assets may be impaired at the balance date. If the result of the impairment test indicates that the recoverable amount of an asset is less than its carrying amount, a provision for impairment and an impairment loss are recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and the present value of the future cash flows expected to be derived from the asset. Provision for asset impairment is determined and recognised on the individual asset basis. If it is not possible to estimate the recoverable amount of an individual asset, the recoverable amount of a group of assets to which the asset belongs is determined. A group of assets is the smallest group of assets that is able to generate independent cash inflows.

(4) Significant changes in accounting policies

The Ministry of Finance released the revised *Accounting Standard for Business Enterprises No. 21 - Lease* (hereinafter referred to as "new lease standards") in 2018 and the *Circular on the Amendment to the Formats of Corporate Financial Statements for the Year of 2019* (Cai Kuai [2019] No. 6) in 2019. The financial statements for the six months ended 30 June 2019 are prepared in accordance with the above standards and circular. The impacts on the financial statements of the Group and the Company are as follows:

Notes to the Financial Statements

(All amounts in RMB Yuan unless otherwise stated)

2. Summary of significant accounting policies and accounting estimates (*continued*)

(4) Significant changes in accounting policies (*continued*)

(a) Leases

In accordance with relevant provisions of the new lease standards, the Group recognised the cumulative effect of initially applying the standard as an adjustment to relevant line items in the financial statements for the year ended 31 December 2019. The comparatives for the year ended 31 December 2018 were not restated.

The nature and the reasons of the changes in accounting policies	The line items affected	The amounts affected 1 January 2019 The Group
For operating lease contracts that existed prior to the initial implementation of the new lease standards, the Group has different connection methods according to the remaining lease period:	Right-of-use assets	234,963,917
	Lease liabilities	(198,596,521)
	Current portion of non-current liabilities	(26,230,361)
If the remaining lease term is over 1 year, on 1 January 2019 (the “initial implementation date”), the Group measured lease liabilities based on the present value of the remaining lease payments discounted at the incremental borrowing rate on the initial implementation date. At the same time, the Group selected an amount equal to lease liabilities and measured the right-of-use asset based on the prepaid rental after necessary adjustment.	Advances to suppliers	(13,968,903)
	Other payables	3,831,868

If the remaining lease term is less than 1 year, the Group adopted a simplified method and do not recognise right-of-use assets and lease liabilities, which has no significant impact on the financial statements.

For operating lease contracts for low-value assets that existed prior to the initial implementation of the new lease standards, the Group adopt a simplified method and do not recognise right-of-use assets and lease liabilities, which has no significant impact on the financial statements.

Notes to the Financial Statements

2. Summary of significant accounting policies and accounting estimates (*continued*)

(4) Significant changes in accounting policies (*continued*)

(a) Leases (*continued*)

As at 1 January 2019, when the Group measured the lease liabilities, the same discount rate was adopted for the lease contracts with similar characteristics, and the weighted average of the incremental borrowing rate adopted was 4.88%.

As at 1 January 2019, the Group's reconciliation from the minimum operating lease payments not paid yet disclosed under the old lease standards to the lease liabilities recognised under the new lease standards are as follows:

	The Group
Future minimum operating lease payments disclosed as at 31 December 2018	274,950,045
Present value of minimum operating lease payments discounted at the incremental borrowing rate	224,826,882
Lease liabilities (including current portion of non-current liabilities) recognised as at 1 January 2019	224,826,882

- (2) Vesting period: the lock-in period of the incentive share awarded by the incentive plan is 48 months. From the date when the incentive share is awarded to the incentive employees, the incentive stock first awarded will be unlocked completely at one time after 48 months from the date of the first award, the reserved part of the incentive share will be unlocked at the same time as the incentive stock first awarded; The share of incentive stock awarded by the incentive plan through the employee share ownership platform indirectly owns incentive stock after paying subscription price. (4) Repurchase clause

Unlocked share of incentive stock is repurchased by the general partner of the partnership at the price of payment of contribution. The Company will repurchase and cancel the unregistered or unlocked incentive stock from the partnership at RMB10.47 per share 12 months after the expiration of incentive plan lock-in period.

13 Financial risk

The Group's activities expose it to a variety of financial risks: market risk (primarily interest rate risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance.

(1) Market risk

(a) Foreign exchange risk

The Group's major operational activities are carried out in Mainland China and a majority of the transactions are denominated in RMB. The Group is exposed to foreign exchange risk arising from the recognised assets, primarily with respect to HKD. The Group's finance department at its headquarters is responsible for monitoring the amount of assets and transactions denominated in foreign currencies, to reduce foreign exchange risk to the greatest extent.

As at 30 June 2019 and 31 December 2018, the carrying amounts in RMB equivalent of the Group's assets denominated in foreign currencies are summarised below:

	30 June 2019 (Unaudited)		
	HKD	USD	Total
Financial assets denominated in foreign currency -			
Cash at bank and on hand	6,743,007	8,318,012	15,061,019

	31 December 2018 (Audited)		
	HKD	USD	Total
Financial assets denominated in foreign currency -			
Cash at bank and on hand	34,063,970	15,166,718	49,230,688

As at 30 June 2019, for various financial assets denominated in HKD, if the RMB strengthens/weakens by 3% against the HKD while holding all other variables constant, the Group's net profit for the period will be approximately RMB151,718 (31 December 2018: RMB766,439) lower/higher. For various financial assets denominated in USD, if the RMB strengthens/weakens by 3% against the USD while holding all other variables constant, the Group's net profit for the period will be approximately RMB187,155 (31 December 2018: RMB341,251) lower/higher.

Notes to the Financial Statements

For the six months ended 30 June 2019

(All amounts in RMB Yuan unless otherwise stated)

13 Financial risk *(continued)*

(1) Market risk *(continued)*

(b) Interest rate risk

The Group's interest rate risk arises from long-term interest bearing borrowings including long-term borrowings. Financial liabilities issued at floating rates expose the Group to cash flow interest rate risk. Financial liabilities issued at fixed rates expose the Group to fair value interest rate risk. The Group determines the relative proportions of its fixed rate and floating rate contracts depending on the prevailing market conditions. As at 30 June 2019, the Group's long-term interest-bearing borrowings were mainly RMB-denominated contracts with fixed rates, amounting to RMB79,000,000 (31 December 2018: RMB80,000,000).

The Group's finance department at its headquarters continuously monitors the interest rate position of the Group. Increases in interest rates will increase the cost of new borrowings and the interest expenses with respect to the Group's outstanding floating rate borrowings, and therefore could have a material adverse effect on the Group's financial position. Management of the Group makes adjustments timely with reference to the latest market conditions.

As at 30 June 2019, taking into account the impact of interest capitalization, if the interest rate of long-term borrowings calculated at floating rate had risen/fallen by 50 basis points while all other variables had been held constant, the Group's net profit would not decrease/increase with the impact of interest capitalisation taken into consideration (30 June 2018: The same).

(2) Credit risk

Credit risk is managed on the grouping basis. Credit risk mainly arises from cash at bank, accounts receivable, other receivables and long-term receivables, etc.

The Group expects that there is no significant credit risk associated with cash at bank since they are deposited at state-owned banks and other medium or large size listed banks. Management does not expect that there will be any significant losses from non-performance by these counterparties.

Notes to the Financial Statements

For the six months ended 30 June 2019

(All amounts in RMB Yuan unless otherwise stated)

13 Financial risk *(continued)*

(2) Credit risk *(continued)*

The Group's accounts receivable mainly arise from sales of pharmaceuticals and medical services to patients, as well as the management service fee. According to the local social security policy applicable to the Group's hospitals, the patient's medical expenses are usually borne by the patient and social insurance. The Company usually collects certain prepayment when the patient goes through the hospitalisation procedure. When the patient is discharged from the hospital, the patient needs to settle the part that should be borne by the patient. For the patients who have not settled the payment at the time of discharge, the Company collects the owed money through regular collection requests. For the medical expenses that should be borne by social insurance, the Company will apply for reimbursement to the social insurance institution in time after issuing the invoice to the patient. The reimbursement is usually received within 2-9 months after the application for reimbursement. The Company believes that there is no significant credit risk associated with the reimbursement. The Group also has some medical expenses that should be borne by the government departments such as the Civil Affairs Bureau and the Disabled Persons' Federation. The Group will adopt different collection monitoring mechanisms for different payers.

Other receivables include the guarantee and deposit of the lease contract, staff reserve, prepayment for employees' social insurance contributions, borrowings to the third parties and receivables from related parties. After considering the credit status of the counterparties and the guarantees provided (if any), the Company believes that there is no significant credit risk.

Long-term receivables is the deposit of payment to project contractors and the Company believes that there is no material credit risk.

(3) Liquidity risk

Cash flow forecasting is performed by each subsidiary of the Group and aggregated by the Group's finance department in its headquarters. Cash flow forecasting is performed by each subsidiary of the Company and aggregated by the Company's finance department in its headquarters. The Company's finance department at its headquarters monitors rolling forecasts of the Company's short-term and long-term liquidity requirements to ensure it has sufficient cash and cash equivalent to meet operational needs, while maintaining sufficient headroom on its undrawn committed borrowings facilities from major financial institutions so that the Group does not breach borrowings limits or covenants on any of its borrowings facilities to meet the short-term and long-term liquidity requirements.
